## Bottom line

3Red is a Chicago proprietary trading firm (about 55 people, 200 W Monroe). It showed **Networking/Telecom intent at 91 with audience strength A** on Sep 12. A score like that from a firm this small usually means one or two people are actively shopping. HubSpot has no contacts. Apollo found **George Dragoi, Head of Technology (ex-Tower Research)** and **Max Leiser, Systems Engineer (ex-WH Trading)**, both with verified emails.

## What 3Red is, in one analogy

A small firm with strong intent is a single shopper in an empty store reading labels. You don't need a crowd; you need to be on the shelf when he looks up.

## Not worth chasing for this goal

Traders and quants.

## How the access path should run

## Messages, by contact

### 1. George Dragoi Head of Technology

*Why them: Owns the decision.*

**Channel: Email Tue Oct 6 | Subject: 3Red's Chicago paths**

George, a quick one from a Chicago fiber owner: are 3Red's paths between 200 W Monroe and the exchanges verified diverse at the conduit? Crosstown owns underground fiber on-net at 350 E Cermak and Elk Grove and can show it on a map. Worth 20 minutes?

### 2. Max Leiser Systems Engineer

*Why them: Practical; offer the map.*

**Channel: Email Thu Oct 8 | Subject: Chicago conduit map (KMZ)**

Max, I can send our Chicago route map in KMZ so you can check current circuits for shared paths. Want it?
