

Ansatz Capital: a small quant firm where partners decide

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: ZoomInfo, Apollo

~16 employees	NY HQ per ZoomInfo (HubSpot: Chicago)	2 partners with verified emails	0 touches so far
STAGE Untouched prospect. No deal.	RUNNING NOW CTF SCORE - Tier A call-first (Hyun Kim), launched Oct 1-2	LAST TOUCH None	NEXT STEP Cadence running: call, then email, then LinkedIn

Bottom line

Ansatz is a small quantitative trading firm (about 16 people). ZoomInfo puts it in New York (150 Greenwich St); HubSpot lists Chicago. It has no signals. Partners decide at this size. **Hyun Kim** traded at **Getco and KCG** (Chicago-born HFT firms) and started at DRW, so he knows Chicago connectivity. **Albert Shieh** came from D. E. Shaw Research. Both have verified emails.

What Ansatz is, in one analogy

Ansatz is a small lab run by its scientists: no procurement office, the people running the experiment choose the equipment.

Signals worth citing

How the access path should run

Messages, by contact

1. Hyun Kim Partner

Why them: Getco/KCG background; Chicago fluent.

Channel: Email Thu Oct 8 | Subject: Ansatz's Chicago paths

Hyun, from your Getco and KCG days you'll know Chicago's shared-duct problem. Crosstown owns underground fiber on-net at 350 E Cermak and Elk Grove, mapped to the conduit, so diversity can be proven, not assumed. If Ansatz trades from Chicago, I'm happy to share the map.

The plan

When	Move	Notes
Fri Oct 2	Fix the HubSpot HQ (New York) and domain (ansatzcapital.com for email).	-
Thu Oct 8	Email Hyun Kim.	-
Thu Oct 15	Email Albert Shieh if silent.	-
Nov 2	Park if no reply.	-
