

Answering i3D.net's 'lease, not IRU' reply

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo

Oct 1 reply from i3D's Interconnection Manager	Lease the structure they said they'd buy	2 LinkedIn connections (Sep 16)	16 i3D leads in Wave C
STAGE Wave C prospect; replied Oct 1. No deal.	RUNNING NOW CTF ABM - i3D.net (Wave C), 16 leads; Edwin Punt paused	LAST TOUCH Oct 1: you replied to Edwin (3-5 year terms and short-term leases are available)	NEXT STEP Hold for Edwin's lease request; light check-in next quarter

Bottom line

Edwin Punt, i3D's Interconnection Manager, replied this morning: i3D doesn't use IRUs because 'gaming changes too quickly and we need flexibility to adjust the network when and where needed', and if they need fiber in Chicago 'we will be in touch for a lease solution'. Lemlist tagged it negative, but it's a clear statement of how to win: **a short-term lease, not an IRU**. i3D is Ubisoft's game-hosting network, also contacted in February and March (to Martijn Schmidt) without a reply, and two architects accepted LinkedIn invites on Sep 16. The plan: thank Edwin today, confirm whether Crosstown can offer a lease or shorter-term structure, and pause the rest of the sequence so 15 more people don't get pitched IRUs after he said no to them.

What i3D wants, in one analogy

i3D is telling you it rents apartments; it doesn't buy condos. Games launch and fade, so it wants to move its network the way a touring band moves venues. If you can offer a lease, you're back in the conversation.

Signals worth citing

Signal	Source	So what for the opener
Edwin Punt (Interconnection Manager), Oct 1: no IRUs; flexibility needed; will reach out for a lease if Chicago fiber is needed	Lemlist inbox	A buying criterion, not a rejection. Answer with a lease option.
Giuseppe Grieco and Fabien Vincent (network architects) accepted LinkedIn Sep 16	Lemlist	Two connected technical contacts.
Feb 24 / Mar 3, 2026 emails to Martijn Schmidt: 'Fiber Routes Supporting i3D.net's Chicago Network'	HubSpot email history	Earlier attempt; no reply.
No recent ZoomInfo signals; parent Ubisoft	ZoomInfo	No trigger beyond the reply.
Check first	Before replying with specifics, confirm with Tony Marcos whether Crosstown can offer a lease or shorter-term product on dark fiber or wavelengths. Your Sep 30 email pitched 'dark fiber and IRUs' only.	

Work already in motion

When	Channel / campaign	What happened	Read
Feb 24 / Mar 3, 2026	Personal emails	To Martijn Schmidt	No reply
Sep 11-28	Wave C	Emails to CTO Giovanni Intini, VP Eng Edwin Verwoerd; LinkedIn invites	Grieco and Vincent accepted Sep 16
Sep 17-28	LinkedIn DMS + email	Conduit question; 'what the diversity math looks like for a GPU cluster'; 15-minute map offer	No replies
Sep 29-30	Calls + 10 new leads	Calls to architects and executives; 10 network/DC staff added	-
Oct 1	Email reply	Edwin Punt: no IRUs, will ask for a lease if needed	Lead paused
Oct 1	Your reply to Edwin	Noted 3-5 year terms and short-term leasing are available	Ball in his court

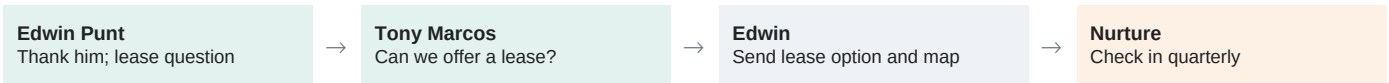

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Edwin Punt	Interconnection Manager (HubSpot)	Netherlands	Replied. Owns interconnection decisions.	Replied Oct 1. edwin.punt@i3d.net
Fabien Vincent	Network Architect (HubSpot)	France	Connected on LinkedIn.	Connected Sep 16; no reply
Giuseppe Grieco	Senior Data Infrastructure Engineer (HubSpot)	Italy	Connected on LinkedIn.	Connected Sep 16; no reply
Scott Fann	NOC Engineer (HubSpot)	Atlanta (404)	US-based; knows US PoPs.	Email 1 Sep 30
Louis Groulx-Robert / Chris Dobson	Technical Director IT Infra / Global DC Ops Manager (HubSpot)	Montreal (514)	North American operations.	Wave C

Not worth chasing for this goal

Pause the remaining 14 leads. Edwin has given the company's position; more IRU emails would undercut it.

How the access path should run

Messages, by contact

1. Edwin Punt Interconnection Manager

Why them: Reply the same day; keep the door open on his terms.

Channel: Email reply, Thu Oct 1 | Subject: Re: fiber is the bottleneck under your edge network, not the racks

Edwin, thanks for the clear answer; that's genuinely helpful. Understood on IRUs. I'll check what lease terms we can offer in Chicago so it's ready if you need it. Would it help if I sent our ring map now so your team has it on file?

2. Edwin Punt Interconnection Manager

Why them: Follow-up once lease terms are confirmed.

Channel: Email, week of Oct 12 | Subject: Chicago lease option, for your files

Edwin, as promised: here's what a shorter-term lease on our Chicago routes looks like, plus the map. No action needed; it's here when i3D needs it.

The plan

When	Move	Notes
Thu Oct 1 (done)	Replied to Edwin: 3-5 year terms and short-term leases are available.	Done.
Hold	Keep the other i3D leads paused; wait for Edwin's lease request.	-
Jan 2027	Light check-in with Edwin on Chicago plans.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 2	Same-day reply sent	Email logged
Oct 16	Lease option confirmed internally and sent	Logged

Guardrails

- Never pitch an IRU to i3D again unless they ask.
- Credits used: ZoomInfo company and signals for 1 company.
