## Bottom line

CoreSite (American Tower's data center business) operates a Chicago data center in the Loop and sells interconnection and cloud on-ramps (it added Oracle FastConnect in San Jose on Sep 1). Its customers in Chicago need diverse paths to Cermak and Elk Grove. **Ron Rodi (Senior Director, Sales)** was enrolled Sep 30. Offer a referral relationship and confirm our route distance to CoreSite's Chicago site.

## What a data center partner is, in one analogy

A data center is a port; Crosstown builds the roads out of it. Ports recommend the roads their customers should use.
