Bottom line

CyrusOne (\$1.2B) is **hiring a Director of Construction and Development and a Regional Operations Director in Aurora, IL** (Sep 18-25), and operations roles are at a 12-month high. Aurora is where CME's data center sits, and a CyrusOne campus there will need **diverse fiber back to 350 E Cermak and Elk Grove**. A former executive now leads a new AI data center venture (Theseus Infrastructure). Get in front of the Aurora build now. **Russell Pease (Global Director, Solutions)** was enrolled Sep 30.

What a data center partner is, in one analogy

A data center is a port; Crosstown builds the roads out of it. Ports recommend the roads their customers should use.
