

Resetting Enfusion after a bounced sequence

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo, Apollo

2 of 3 Wave A emails bounced	0 network people in the sequence	1,143 employees; now part of Clearwater (CWAN)	125 S Clark Chicago HQ, in the Loop
STAGE Tier A prospect. No deal.	RUNNING NOW CTF ABM - Enfusion (Wave A): 1 live lead (VP IT, India)	LAST TOUCH Sep 29: email to Xier Li bounced	NEXT STEP Mon Oct 5: email Sung Chang (Lead, Network Engineering)

Bottom line

The Enfusion sequence has been talking to the wrong people. Both IT Project Directors bounced and the only live lead is a VP of IT in India. Meanwhile, Enfusion is now part of **Clearwater Analytics (CWAN)**, and its Chicago network lead, **Sung Chang (Manager/Lead, Network Engineering)**, now uses a clearwateranalytics.com email. He came from Citadel, CME and Optiver, so he speaks fluent trading-grade networking. Clearwater is also on your account list. Treat Enfusion and Clearwater as **one buying center**: stop the Enfusion sequence, start a single hand-run thread with Sung Chang, and fold the Clearwater plan into it.

What Enfusion is, in one analogy

Enfusion is the cockpit software hedge funds fly by: positions, risk and orders on one screen. When a bigger airline (Clearwater) buys the cockpit maker, the two companies merge their hangars. Hangar consolidation is when fiber gets re-planned.

Signals worth citing

Signal	Source	So what for the opener
Enfusion is now part of Clearwater Analytics (ZoomInfo parent; Apollo shows 'Enfusion (Now CWAN)')	ZoomInfo, Apollo	Integration means data center and network consolidation decisions in 2026-27. The best reason to talk now.
Cloud Computing intent 91 (audience C), Sep 12, 2026	ZoomInfo intent	Cloud-only intent doesn't count under the trigger rules, but it fits a migration or consolidation project. Use as context, not as the opener.
Sung Chang: ex-Citadel, CME Group and Optiver network engineer	Apollo	Knows Chicago trading networks and diverse paths deeply. Skip basics.
Afifa Shaikh (Sep 10) and Xier Li (Sep 29) emails bounced; several steps skipped because variables were unsubscribed	HubSpot / Lemlist	List quality problem. Clean the records before Salesforce upload.

Check first

Clearwater Analytics is a separate account on your book. Decide which record owns this opportunity in Salesforce so the two plans don't collide; recommended: Clearwater as parent, Enfusion as child.

Work already in motion

When	Channel / campaign	What happened	Read
Sep 9-10	Wave A, visit + email 1	Email to Afifa Shaikh bounced; LinkedIn profile can't be visited	Bad record
Sep 10-23	Wave A	Baisakhi Sen (VP IT) received both emails and LinkedIn follow	No reply
Sep 21-30	Wave A	Several steps skipped: 'variable is unsubscribed'	Sequence degraded
Sep 28-29	Wave A, new lead	Xier Li added; email bounced next day	Bad record
Sep 30	CTF ENT Leaders	Duplicate removed; Shaikh call task ignored	-

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Sung Chang	Manager/Lead, Network Engineering, since Dec 2020 (Apollo). Ex-Citadel, CME, Optiver.	Northbrook, IL	Owns the Chicago network. Not in HubSpot or Lemlist.	Not contacted. sung.chang@clearwateranalytics.com (verified)
Baisakhi Sen	VP, Information Technology (HubSpot)	India	Senior IT, but offshore; not the network buyer.	Wave A, no reply
Clearwater network leadership	To be identified in the Clearwater plan	Boise / Chicago	Integration decisions likely sit at the parent.	See Clearwater Analytics plan

Not worth chasing for this goal

Afifa Shaikh and Xier Li (IT Project Directors) bounced; remove them. Baisakhi Sen can finish the sequence but gets no extra touches.

How the access path should run

Messages, by contact

1. Sung Chang Lead, Network Engineering

Why them: The real owner, untouched, with deep Chicago trading-network background.

Channel: Email, Mon Oct 5; LinkedIn connect without a note the same day | Subject: Enfusion's Chicago paths after the CWAN merger
Sung, with your Citadel and CME background I'll skip the basics. As Enfusion folds into Clearwater, are the Chicago paths out of 125 S Clark being re-planned, or staying as they are? Crosstown owns underground fiber in the Loop and can show conduit-level diversity, not carrier attestation. Worth 15 minutes?

2. Sung Chang Lead, Network Engineering

Why them: Follow-up with something concrete.

Channel: Email reply, Tue Oct 13 | Subject: Re: Enfusion's Chicago paths

Sung, I mapped our ring against 125 S Clark. Happy to send the overlay so you can check for shared conduit with your current carriers; no meeting needed. Want it?

The plan

When	Move	Notes
Thu Oct 1	Mark Shaikh and Li as bounced in HubSpot; remove them from Wave A.	Clean data before Salesforce.
Fri Oct 2	Let Baisakhi Sen finish Wave A; don't add steps.	-
Mon Oct 5	Add Sung Chang to HubSpot (Enfusion and Clearwater). Email him; LinkedIn connect.	Hand-run only.
Tue Oct 13	Follow-up with the 125 S Clark overlay offer.	-
Week of Oct 19	Coordinate with the Clearwater plan: one combined outreach to the parent's network leader.	One buying center, one story.
Week of Oct 26	Goal: 15-minute call with Sung Chang.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 16	Reply from Sung Chang	Email logged
Oct 30	Know whether Enfusion's Chicago network is being re-planned under CWAN	Note in HubSpot; deal created if yes

Guardrails

- Don't email anyone at both Enfusion and Clearwater in the same week.
- Credits used: 1 Apollo person enrichment; ZoomInfo company and signals for 1 company.
