

Finding the infrastructure owner at Fireworks AI

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo, Apollo

91 Networking/Telecom intent, audience A (Sep 26)	91 Data Center intent, audience A (Sep 12)	\$1B annualized revenue (5x growth)	0 network or infrastructure leaders in the sequence
STAGE Wave C prospect. No deal.	RUNNING NOW CTF ABM - Fireworks AI (Wave C), 3 leads	LAST TOUCH Sep 29: voicemails to both Field CTOs	NEXT STEP Mon Oct 5: identify the infrastructure lead (ZoomInfo search)

Bottom line

Fireworks has the strongest signals in Wave C: **Networking/Telecommunications intent 91** and **Data Center intent 91**, both with **the largest audience (A)**, plus \$1B in annualized revenue and a **\$1.5B Series D (Jul 16)**. Jensen Huang called it 'the TSMC of AI factories'. But your sequence is aimed at two **Field CTOs**, who are customer-facing presales leaders, not infrastructure buyers. Both got voicemails on Sep 29. Apollo found no network or data center leader at Fireworks, so the first move is research: find who runs infrastructure, then send one tight note.

What Fireworks is, in one analogy

Fireworks runs the kitchens where companies cook their own AI models. The Field CTOs are the maître d's who seat customers; the people who buy the gas lines work in the back. You've been talking to the front of house.

Signals worth citing

Signal	Source	So what for the opener
Networking/Telecommunications intent 91 (audience A), Sep 26; Data Center intent 91 (audience A), Sep 12	ZoomInfo intent	Two strong, recent, network-relevant signals with the largest audience.
\$1.5B Series D at \$17.5B valuation (Jul 16); \$1B annualized revenue (Sep 12)	ZoomInfo news, scoop	Funded to scale capacity.
HR open roles at a 12-month high (Sep 24)	ZoomInfo scoop	Rapid hiring; infrastructure team is likely growing too.
No network or infrastructure leaders found in Apollo	Apollo	Small, engineering-led team; network decisions may sit with a founding engineer or a cloud partner.

Work already in motion

When	Channel / campaign	What happened	Read
Sep 11	Wave C, email 1	To both Field CTOs	No replies
Sep 16	Wave C	Email steps skipped as 'already bounced' on some addresses	Check deliverability
Sep 18-28	Wave C, emails 2-3	'The part of your interconnect map you can't see'; 'Who owns this call at Fireworks AI?'	No replies
Sep 28-29	New lead	Colin Steidtmann (Cloud Infrastructure Engineer) added; email 1	-
Sep 29	Phone	VMs to Siddharth Dhulipalla and Shaunak Godbole about Chicago connectivity and Illinois projects	No callbacks

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Infrastructure lead (to identify)	Head of Infrastructure / Capacity / Network (search ZoomInfo)	n/a	The real buyer.	Unknown. Research Mon Oct 5
Colin Steidtmann	Cloud Infrastructure Engineer (HubSpot)	n/a	Closest to infrastructure; can name the owner.	Wave C, email 1 Sep 29
Siddharth Dhulipalla	Field CTO (HubSpot)	New Jersey (732)	Presales; can redirect you internally.	3 emails + 2 calls; no reply
Shaunak Godbole	Field CTO (HubSpot)	n/a	Presales.	3 emails + VM; no reply

Not worth chasing for this goal

Don't escalate to the founders (Lin Qiao, CEO) until you know who owns infrastructure.

How the access path should run

Messages, by contact

1. Colin Steidtmann Cloud Infrastructure Engineer

Why them: Can name the owner in one line.

Channel: Email Tue Oct 6 | Subject: Who owns data center connectivity at Fireworks?

Colin, quick one. Who at Fireworks decides how your data center sites connect: your infra team, or your cloud and colo partners? I own fiber in Chicago and would rather ask than guess. A name is plenty.

2. Infrastructure lead To be identified

Why them: Use once the name is known.

Channel: Email, week of Oct 12 | Subject: Fireworks' Chicago paths

[Name], as Fireworks scales capacity, I'm curious whether any of it lands in or routes through Chicago. Crosstown owns underground fiber on-net at 350 E Cermak and Elk Grove. If that's useful, I'll send a map; if not, no follow-up.

The plan

When	Move	Notes
Mon Oct 5	ZoomInfo search for Fireworks infrastructure, capacity, network and data center leaders.	Credits approved.
Tue Oct 6	Email Colin Steidtmann (ownership question).	-
Fri Oct 9	Let the Field CTO sequence end; no more calls to them.	-
Week of Oct 12	Email the infrastructure lead once identified.	-
Week of Oct 26	Goal: name and first conversation with the infrastructure owner.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 9	Infrastructure owner identified	Added to HubSpot
Oct 30	Reply or call with that owner	Logged

Guardrails

- Stop calling Field CTOs; two voicemails each is enough.
- Credits used: ZoomInfo company and signals for 1 company; 1 Apollo search.
