

Qualifying Gcore's US edge plans

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo, Apollo

600 employees, 8 locations (Luxembourg HQ)	4 leads in Wave C; none US-based	150% DDoS growth in Gcore's own Radar report	0 replies
STAGE Wave C prospect. No deal.	RUNNING NOW CTF ABM - Gcore (Wave C), 4 leads	LAST TOUCH Sep 30: call tasks ignored	NEXT STEP Mon Oct 5: find a US network or interconnection owner

Bottom line

Gcore is a Luxembourg-based edge cloud, CDN and AI inference provider (about 600 people) that sells sovereign European infrastructure and GPU VMs. Its network team in your sequence is in Russia-adjacent and EU time zones, one email was bad (gcorelabs.com), and nobody replied. Apollo shows no US-based network leaders. Gcore has Chicago PoPs as a CDN, but its fiber decisions are likely made centrally in Europe. Treat Gcore as low priority: one targeted email to the Head of Edge Network Operations, then nurture.

What Gcore is, in one analogy

Gcore runs a chain of small delivery depots across continents. Each depot in a city like Chicago needs a short road to the highway, but the depot plans are drawn at headquarters in Europe.

Signals worth citing

Signal	Source	So what for the opener
Launched AzInCloud with AzInTelecom (Sep 20); hiring an Infrastructure Project Manager (Sep 9)	ZoomInfo scoops	Expansion is focused outside the US.
GPU VMs on NVIDIA (Mar 31), NVIDIA Dynamo integration (Feb 25)	ZoomInfo news	AI inference push.
Gcore Radar: DDoS attacks up 150% year on year (Mar 24)	ZoomInfo news	Resilience talking point.
No US-based network leaders in Apollo	Apollo	Decisions are made in Europe.

Work already in motion

When	Channel / campaign	What happened	Read
Sep 11	Wave C, email 1	To Gerasimov, Nugmanov, Rudenko; Tukai's address failed	No replies
Sep 15-16	Wave C	Steps skipped (no LinkedIn URL / bounced)	-
Sep 18-28	Wave C, emails 2-3	'Who owns this call at Gcore?'	No replies
Sep 30	Call tasks	Ignored	-

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Andrey Gerasimov	Head of Edge Network Operations (HubSpot)	Europe	Owens edge PoP network operations.	Wave C, 3 emails
Mark Rudenko	Lead Network Engineer (HubSpot)	Europe	Technical.	Wave C, 2 emails
US interconnection lead (to identify)	Search ZoomInfo	US	Would own Chicago PoP connectivity.	Unknown

Not worth chasing for this goal

Damir Nugmanov (DevOps) and Ilya Tukai (invalid gcorelabs.com address) are not buyers.

How the access path should run

Messages, by contact

1. Andrey Gerasimov Head of Edge Network Operations

Why them: Owns the PoP network; one question.

Channel: Email Mon Oct 5 (morning CT = afternoon in Europe) | Subject: Gcore's Chicago PoP

Andrey, one question. Who at Gcore decides how your Chicago PoP connects to the local data centers and carriers? I own underground fiber in Chicago, on-net at 350 E Cermak, and want to speak to the right person once.

The plan

When	Move	Notes
Thu Oct 1	Remove Ilya Tukai (bad email) from Wave C.	-
Mon Oct 5	Email Gerasimov.	-
Week of Oct 12	ZoomInfo search for a US network/interconnection owner.	-
Nov	Nurture if no US owner.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 30	Know who owns US PoP connectivity	HubSpot note

Guardrails

- Don't claim specifics about Gcore's Chicago PoP; ask.
- Credits used: ZoomInfo company and signals for 1 company; 1 Apollo search.
