

Imperva: colocation intent from a DDoS network that needs PoPs

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo

95 Colocation intent (Sep 12)	95 Cloud intent, audience A	28 Imperva contacts in HubSpot	0 replies so far
STAGE Prospect. No deal.	RUNNING NOW CTF ENT - Practitioners (NOC, Israel); INTL (Ratush, Ungson, Hirsch, Moyle-Croft, Chitturi, Sokhen and others)	LAST TOUCH Sep 30: enrollments; Feb 24 and Mar 3 emails to Francis Arigo (no reply)	NEXT STEP Mon Oct 5: email Yat Lee (Network Architect)

Bottom line

Imperva, now part of Thales, runs a global DDoS and application-security network built on PoPs in data centers. ZoomInfo shows **Colocation 95 and Cloud 95 (audience A)**. Its outreach so far went to NOC engineers in Israel and an APJ strategy manager. The people who design PoP connectivity are the **network architect (Yat Lee)** and **senior network engineers (Stanley Wilson, Lakshmi Chitturi)**. We should also find whoever owns **network strategy for the Americas**.

What Imperva is, in one analogy

Imperva runs fire stations for websites. Each station needs a fast, separate road out, or it can't respond to a fire.

Signals worth citing

Signal	Source	So what for the opener
Colocation 95 (B), Sep 12	ZoomInfo intent	PoP or facility expansion.
Cloud 95 (A), Sep 26	ZoomInfo intent	Cloud integration.
Matthew Moyle-Croft, Network Strategy Manager - APJ	HubSpot	Suggests regional strategy roles exist; find the Americas one.

Work already in motion

Prior outreach went to NOC staff and got no reply.

When	Channel / campaign	What happened	Read
Feb 24, Mar 3	HubSpot email	Francis Arigo	No reply
Sep 30	Practitioners and INTL	NOC engineers (Israel), Moyle-Croft (APJ), Chitturi, Sokhen	No reply yet

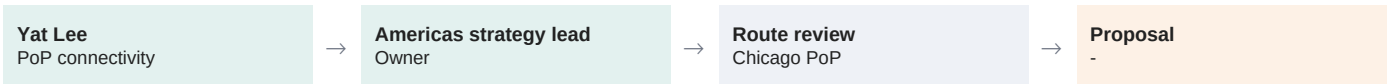

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Yat Lee	Network Architect (HubSpot)	n/a	Designs PoP networking.	Not contacted
Stanley Wilson	Senior Network Engineer (HubSpot)	n/a	Technical.	Not contacted
Lakshmi Chitturi	Senior Network Engineer (HubSpot)	n/a	Technical.	INTL
(to find)	Network Strategy Manager, Americas	US	Owner.	ZoomInfo search

Not worth chasing for this goal

NOC analysts (operators), DDoS engineers, APJ staff.

How the access path should run

Messages, by contact

1. Yat Lee Network Architect

Why them: Designs PoP connectivity.

Channel: Email Mon Oct 5 | Subject: Chicago PoP paths for Imperva

Yat, if Imperva is adding colocation capacity in Chicago, Crosstown owns underground fiber on-net at Equinix and Digital Realty at 350 E Cermak and Equinix CH3, mapped to the conduit. For a DDoS network, separate paths out of the PoP matter. Can I send the KMZ?

The plan

When	Move	Notes
Mon Oct 5	Email Yat Lee.	-
Wed Oct 7	ZoomInfo search for the Americas network strategy lead.	-
Fri Oct 9	Email Stanley Wilson.	-
Week of Oct 19	Goal: technical call.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 16	Reply or referral	Logged
Nov 6	Technical call held	Meeting logged
