

Selling McKay Brothers the fiber under its microwave

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo, Apollo

3 new latency-route announcements (Sydney, Toronto, Go West)	12 McKay contacts in HubSpot	Chicago Global Head of NetOps is local	0 conversations so far
STAGE Prospect. No deal.	RUNNING NOW CTF ENT - Practitioners (Michel Sivilay), added Sep 29	LAST TOUCH Sep 29: enrollment only; no email sent yet	NEXT STEP Mon Oct 5: email David Trocki (Global Head of Network Operations)

Bottom line

McKay Brothers sells the fastest microwave routes between trading venues, and this year it kept launching new ones: **Chicago-Sydney, Toronto and the 'Go West' route**. Every microwave network still needs fiber for the last mile into data centers and for backup when rain fades the radio. That is Crosstown's lane: underground fiber on-net at **350 E Cermak and Elk Grove**. The best way in is **David Trocki, Global Head of Network Operations, based in Chicago**. He joined in March 2025 after years as COO of Consolidated Trading, so he has bought Chicago fiber himself.

What McKay is, in one analogy

McKay is an airline that flies the fastest planes, but every passenger still has to take the road from the airport to downtown. Crosstown owns that road in Chicago, and it doesn't close when it rains.

Signals worth citing

Signal	Source	So what for the opener
New Chicago-Sydney, Toronto and Go West low-latency routes announced	ZoomInfo news	Every new route adds Chicago endpoints that need fiber tails and diverse backup.
David Trocki: Global Head of NetOps since Mar 2025; ex-COO Consolidated Trading (Chicago)	Apollo	A Chicago buyer who has purchased fiber before.
12 HubSpot contacts, mostly telecom and low-latency engineers (several in France)	HubSpot	The engineering bench is deep; the decision sits with Trocki.

Work already in motion

McKay has one enrollment and no sent email yet.

When	Channel / campaign	What happened	Read
Sep 29	CTF ENT - Practitioners	Michel Sivilay (Telecom and Low Latency Engineer) enrolled	No messages yet
Sep 29	HubSpot note	Enrollment logged	-

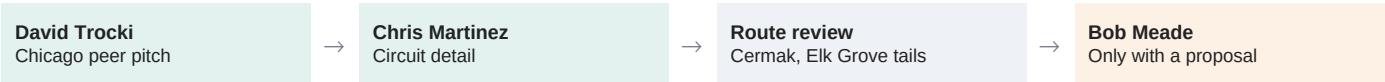

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
David Trocki	Global Head of Network Operations (HubSpot, Apollo)	Chicago	Owns NetOps globally; local buyer.	Not contacted. david.trocki@mc kay-brothers.com
Chris Martinez	Network Operations Manager (HubSpot)	n/a	Day-to-day circuit owner.	Not contacted
Patrick N'da	Core Network Team Lead (HubSpot)	n/a	Core network design.	Not contacted
Michel Sivilay	Telecom and Low Latency Engineer (HubSpot)	n/a	Technical.	CTF ENT Practitioners, Sep 29
Bob Meade	Co-Founder (HubSpot)	n/a	Executive; only with a proposal.	Not contacted. Hold

Not worth chasing for this goal

The NOC technician and construction manager are not buyers. McKay is also a possible partner (resale or referral of low-latency routes); keep that for a second conversation.

How the access path should run

Messages, by contact

1. David Trocki

Global Head of Network Operations
Why them: Local, has bought Chicago fiber before.

Channel: Email Mon Oct 5 + LinkedIn | **Subject:** Fiber tails for McKay's new Chicago routes

David, congrats on the Sydney, Toronto and Go West launches. Each one adds Chicago endpoints that need fiber into the buildings and a backup path when the weather hits the radio. Crosstown owns underground fiber on-net at 350 E Cermak and Elk Grove and maps it to the conduit. From your Consolidated days you'll know how rare that is. Worth 20 minutes to compare against your current tails?

2. Chris Martinez

Network Operations Manager
Why them: Practical; offer the map.

Channel: Email Thu Oct 8 | **Subject:** Chicago conduit map (KMZ)

Chris, I can send Crosstown's Chicago route map in KMZ so you can check where your current tails share conduit. No meeting needed. Want it?

The plan

When	Move	Notes
Mon Oct 5	Email David Trocki; LinkedIn connect.	Lead with the new routes.
Thu Oct 8	Email Chris Martinez with the KMZ offer.	-
Mon Oct 12	Call Trocki's Chicago line if silent.	-
Week of Oct 19	Goal: route review with Trocki and Martinez.	-
Nov	If fit, scope a pilot tail at Cermak or Elk Grove.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 16	Reply from Trocki or Martinez	Logged
Oct 30	Route review held	Meeting logged
Nov 30	Pilot tail scoped	Deal created

Guardrails

- Don't promise latency numbers; McKay knows them better than we do.
- Credits used: Apollo person enrichment; ZoomInfo company and signals for 1 company.
