

# NUSO: a polite 'not in Chicago,' and an INCOMPAS opening

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo

|                                          |                                                                                |                                                                                                        |                                                                                                                  |

| 1<br>reply (Tom Michaels, Sep 30)        | 0<br>NUSO sites in Chicago (per NUSO)                                          | 3<br>NUSO contacts in HubSpot                                                                          | Oct 1-2<br>INCOMPAS, Nashville                                                                                   |
| STAGE<br>Engaged. Not a near-term buyer. | RUNNING NOW<br>CTF INCOMPAS Nashville (Michaels paused after reply; McNeerney) | LAST TOUCH<br>Sep 30: Michaels replied; you answered the same day and asked for an engineering contact | NEXT STEP<br>This week: Tony stops by NUSO's INCOMPAS exhibit; then email Mirian Goutchi (Lead Network Engineer) |

## Bottom line

NUSO is a 139-person unified-communications and contact-center provider based in St. Louis. **Tom Michaels (VP, Platform Services)** replied on Sep 30: NUSO only buys fiber between its own data centers and has nothing in Chicago, but **Tony is welcome at their INCOMPAS exhibit**, and an engineer may be there. You replied the same day and asked for an engineering name. This isn't a deal today. The value is a **relationship**: if NUSO ever adds a Chicago data center or needs a Midwest route, we want to be the first call. **Mirian Goutchi (Lead Network Engineer)** is in HubSpot.

## What NUSO is, in one analogy

NUSO is a friendly neighbor who doesn't need a ride today. Wave, swap numbers, and be the one they call when the car breaks down.

## Signals worth citing

| Signal                                                                                    | Source                 | So what for the opener |
|-------------------------------------------------------------------------------------------|------------------------|------------------------|
| Tom Michaels reply: no Chicago footprint; fiber only between their DCs; visit the exhibit | Lemlist inbox (Sep 30) | Warm but not buying.   |
| No ZoomInfo intent or scoops                                                              | ZoomInfo               | No trigger.            |
| Mirian Goutchi, Lead Network Engineer                                                     | HubSpot                | Engineering contact.   |

## Work already in motion

The only reply in this group.

| When   | Channel / campaign     | What happened                                                         | Read                          |
|--------|------------------------|-----------------------------------------------------------------------|-------------------------------|
| Sep 30 | CTF INCOMPAS Nashville | "Before INCOMPAS in Nashville" to Tom Michaels and Margaret McNeerney | Michaels replied; lead paused |
| Sep 30 | Reply from you         | Will send Tony; asked for an engineering name                         | Waiting                       |

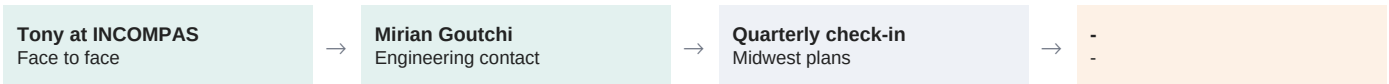

## Who to reach, in order

| Contact            | Title (source)                         | Where | Why they matter         | Status / email    |
|--------------------|----------------------------------------|-------|-------------------------|-------------------|
| Tom Michaels       | VP, Platform Services (HubSpot)        | n/a   | Friendly; gatekeeper.   | Replied Sep 30    |
| Mirian Goutchi     | Lead Network Engineer (HubSpot)        | n/a   | Engineering.            | Not contacted     |
| Margaret McNeerney | SVP Sales, Platform Services (HubSpot) | n/a   | Partner angle (resale). | INCOMPAS campaign |

## Not worth chasing for this goal

Nothing urgent. No sequences after INCOMPAS.

## How the access path should run

## Messages, by contact

### 1. Mirian Goutchi Lead Network Engineer

*Why them: Engineering contact Tom offered.*

**Channel: Email Tue Oct 6 (after INCOMPAS) | Subject: Following up from INCOMPAS**

Mirian, Tom mentioned you might be the right engineer to know. Crosstown owns underground fiber in Chicago. No ask today; if NUSO ever looks at a Midwest site or route, I'd be glad to send our map. Thanks.

## The plan

| When                  | Move                                      | Notes       |
|-----------------------|-------------------------------------------|-------------|
| Thu Oct 1 - Fri Oct 2 | Tony visits the NUSO exhibit at INCOMPAS. | Brief Tony. |
| Tue Oct 6             | Email Mirian Goutchi.                     | -           |
| Jan 2027              | Quarterly check-in with Tom Michaels.     | -           |

## What progress looks like (for management)

| By     | Milestone                    | How we will know |
|--------|------------------------------|------------------|
| Oct 9  | INCOMPAS conversation logged | Note in HubSpot  |
| Jan 15 | Check-in sent                | Logged           |

## Guardrails

- Don't re-sequence Tom; keep it personal.
- Credits used: ZoomInfo company and signals for 1 company.
