

Noble Schools: a new Senior Director of Network Operations and data center intent

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: ZoomInfo, Apollo

Bottom line

Noble is one of Chicago's largest charter networks (network office at **1 N State**). In September ZoomInfo showed **Data Center 91 (audience A), Equinix 83 and Networking/Telecom 83**, which is unusual for a school network and suggests a WAN or data center project. **Robert Amey was promoted to Senior Director of Network Operations in July 2026**, and **Hillary Knutsen** runs facilities and construction. Both have verified emails. E-Rate timing matters: FY2027 requests post this fall.

What a school network is, in one analogy

A charter network is a chain of small branch offices. Each campus is a branch, and the WAN between them is the hallway. If one hallway is out, a whole school is offline on test day.

Signals worth citing

Signal	Source	So what for the opener

E-Rate

Schools buy WAN and internet circuits through the federal E-Rate program. Funding year 2027 requests (Form 470) post this fall and winter, and vendors bid on them. Confirm Crosstown has an E-Rate service provider ID (SPIN) before pitching.

Robert, congrats on the new role. If Noble is planning WAN or data center changes for FY2027, Crosstown owns underground fiber across Chicago, on-net at Equinix at 350 E Cermak, mapped to the conduit. I'd like to understand your campus map before Form 470s go out. 20 minutes?
