

Pico: a network provider researching data centers right now

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo, Apollo

99 Data Center intent score	2 Pico engineers contacted Sep 30	14 Pico contacts in HubSpot	0 replies so far
STAGE Prospect. No deal.	RUNNING NOW CTF ENT - Leaders (Nilay Oak, Jewel Okyere-Benya, touched Sep 30); Practitioners (Clagett, Sazon, Khan); INTL (Vasil Boyadzhiev)	LAST TOUCH Sep 30: first emails to Nilay Oak and Jewel Okyere-Benya	NEXT STEP Mon Oct 5: email Vasil Boyadzhiev directly (move him out of INTL)

Bottom line

Pico runs trading infrastructure for banks and trading firms, including colocation and connectivity in Chicago. ZoomInfo shows **Data Center intent at 99**, the highest score we've seen. Pico is also connecting to the new **Texas Stock Exchange (TXSE)** and released **Corvil 10.2**. A provider that resells connectivity needs diverse fiber more than most. Two network VPs got first emails on Sep 30. The person who owns facilities is **Vasil Boyadzhiev, Director of Global Data Center Operations**, but he sits in the wrong (international) campaign. Move him and email him directly.

What Pico is, in one analogy

Pico is a moving company for trading firms: it promises clients their furniture arrives on time. Crosstown sells the moving company a second road, so one closed highway never makes it late.

Signals worth citing

Signal	Source	So what for the opener
Data Center intent 99	ZoomInfo intent	Actively researching data center options now.
Connecting to TXSE; Corvil 10.2 release	ZoomInfo news	Growing venue footprint means new circuits.
Nilay Oak and Jewel Okyere-Benya emailed Sep 30	HubSpot, Lemlist	Sequence is live; watch for replies.
Seetharam Gorre, CIO	HubSpot	Executive sponsor for later.

Work already in motion

Pico has the most activity of the trading batch.

When	Channel / campaign	What happened	Read
Sep 30	CTF ENT - Leaders	First emails to Nilay Oak (VP, Network Implementation) and Jewel Okyere-Benya (AVP, Network Eng)	Sent, no reply yet
Sep 30	CTF ENT - Practitioners	Thomas Clagett, Kevin Sazon, Faisal Khan enrolled	Queued
Sep 30	CTF INTL	Vasil Boyadzhiev enrolled	Wrong campaign

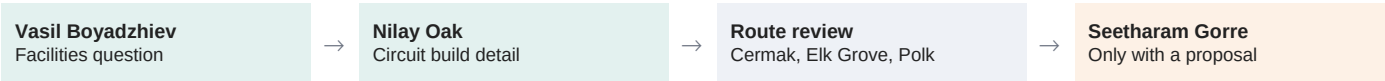

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Vasil Boyadzhiev	Director, Global Data Center Operations (HubSpot)	n/a	Owens facilities; matches the intent.	INTL campaign; move
Nilay Oak	VP, Network Implementation Engineer (HubSpot)	n/a	Builds new circuits.	Emailed Sep 30
Jewel Okyere-Benya	AVP, Network Engineer (HubSpot)	n/a	Technical.	Emailed Sep 30
Ravi Ramar	Senior Network Engineer VP (Apollo)	Singapore	APAC; low priority.	Not contacted
Seetharam Gorre	CIO (HubSpot)	n/a	Executive sponsor.	Not contacted. Hold

Not worth chasing for this goal

NOC analysts and data center engineers are operators, not buyers. Ravi Ramar is in Singapore.

How the access path should run

Messages, by contact

1. Vasil Boyadzhiev Director, Global Data Center Operations

Why them: Matches Data Center intent 99.

Channel: Email Mon Oct 5 | Subject: Pico's Chicago data center paths

Vasil, as Pico adds venues like TXSE, Chicago is still where the futures sit. Crosstown owns underground fiber on-net at 350 E Cermak, Elk Grove and TierPoint on Polk, mapped to the conduit. If you're reviewing Chicago facilities this quarter, I can show which buildings we can link on separate paths.

2. Nilay Oak VP, Network Implementation

Why them: Follow-up to Sep 30 email.

Channel: Lemlist step 2, Oct 6 | Subject: Re: Chicago diversity

Nilay, one practical offer: our Chicago conduit map in KMZ, so your team can check new circuits for shared paths before ordering. Want it?

The plan

When	Move	Notes
Fri Oct 2	Move Vasil Boyadzhiev from INTL to a direct email.	-
Mon Oct 5	Email Vasil.	-
Tue Oct 6	Let Lemlist step 2 go to Oak and Okyere-Benya.	-
Mon Oct 12	Call or LinkedIn the first person who opens twice.	-
Week of Oct 19	Goal: data center path review.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 16	Reply from Vasil or a VP	Logged
Oct 30	Path review held	Meeting logged
Nov 30	Quote requested	Deal created

Guardrails

- Pico is also a possible partner (it resells connectivity). Ask, don't assume.
- Credits used: Apollo person enrichment; ZoomInfo company and signals for 1 company.
