

Finding a US network owner at Qwilt

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo, Apollo

6 Qwilt leads in Wave C	5 of 6 are in Israel	2 outreach waves this year	0 replies
STAGE Wave C prospect. No deal.	RUNNING NOW CTF ABM - Qwilt (Wave C), 6 leads	LAST TOUCH Sep 29: call to CRO Brandon Peccoralo	NEXT STEP Mon Oct 5: ask CRO for the US network/edge deployment owner

Bottom line

Qwilt runs an open edge CDN: it places caching nodes inside internet service providers' networks rather than building its own data centers. That means **its US buyers of fiber are often its ISP partners, not Qwilt itself**. Your Wave C list is almost entirely Israel-based NOC and IT staff plus the CRO, and nobody has replied. The Feb 24 / Mar 3 emails to Mehdi B also got nothing. The plan is to ask one question of the US-based CRO, Brandon Peccoralo, and use the answer to decide whether Qwilt is a buyer or a referral partner.

What Qwilt is, in one analogy

Qwilt puts vending machines inside other people's buildings (ISP networks) instead of opening its own stores. If you sell building access roads, the building owner is usually your customer, not the vending company.

Signals worth citing

Signal	Source	So what for the opener
No intent, news or scoops in the last 10 months	ZoomInfo	No trigger.
Team is Israel-heavy: Head of IT, NOC, network operations, TAM	Lemlist, Apollo	Wrong time zone and wrong function for Chicago fiber.
Feb 24 / Mar 3, 2026: 'Fiber Routes for Qwilt's Chicago Deployments' to Mehdi B	HubSpot email history	Earlier attempt, no reply.

Work already in motion

When	Channel / campaign	What happened	Read
Feb 24 / Mar 3, 2026	Personal emails	To Mehdi B	No reply
Sep 11-28	Wave C, 3 emails	To Peccoralo, Zarchi, Katz, Rozental	No replies
Sep 28-29	Wave C, new leads	Tomer Duchovni, Jose Jimenez: 'fiber is the bottleneck under your edge network, not the racks'	-
Sep 29	Phone	Call to Brandon Peccoralo	No notes logged

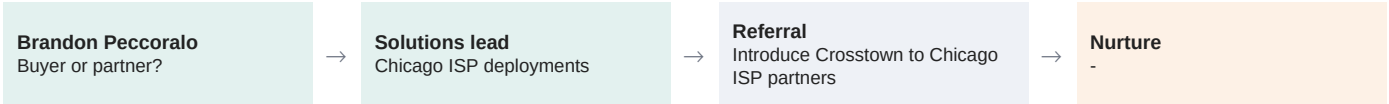

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Brandon Peccoralo	Chief Revenue Officer (HubSpot)	US (609)	US-based exec; knows which ISP partners deploy in Chicago.	Wave C, 3 emails + call
Edmond Sh.	Head of Solutions and Solution Operations (Apollo)	n/a	Runs deployments with partners.	Not contacted
Elad Me.	Network Operations Team Lead (Apollo)	Israel	Technical, offshore.	Not contacted

Not worth chasing for this goal

Eyal Zarchi (Head of IT), Shahar Rozental (CDN TAM), Michel Katz and Tomer Duchovni (NOC) are Israel-based operations staff; let the sequence end.

How the access path should run

Messages, by contact

1. Brandon Peccoralo Chief Revenue Officer

Why them: One question to qualify.

Channel: Email reply in thread, Mon Oct 5 | Subject: Re: who owns this call at Qwilt?

Brandon, one question and I'll get out of your inbox. When Qwilt deploys in Chicago, is the backhaul fiber bought by Qwilt or by the ISP partner hosting the nodes? If it's the partner, I'd be glad to help your Chicago partners with diverse paths, which helps your SLA too.

The plan

When	Move	Notes
Mon Oct 5	Email Peccoralo.	-
Fri Oct 9	Let the Wave C sequence end for Israel-based leads.	-
Week of Oct 19	If Qwilt is not a buyer, re-tag as 'referral partner' in HubSpot.	-
Nov	Nurture.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 19	Know whether Qwilt buys fiber or its partners do	HubSpot note
