Bottom line

Tenaska is a private Omaha energy company (about 800 people, about \$12.5B revenue) that develops power and trades energy. In September ZoomInfo showed **Networking Solutions 91 (audience A)**, **Data Center 94** and Networking/Telecom 78. **Engineering job openings are at a 12-month high**. Apollo found **Marc Pritchard, Director of Network Architecture (a CCIE, ex-AWS and Cisco)** and **Jeremy Reinoehl (CIO)**, both with verified emails. HubSpot also holds two senior network administrators. The Chicago link isn't proven, so open with a question.

What Tenaska is, in one analogy

Tenaska trades energy across the grid; its network is the trading desk's phone line. Ask whether any of those lines run through Chicago.

Why them: Owner; technical peer.

Channel: Email Tue Oct 6 | Subject: Does Tenaska's network touch Chicago?

Marc, a quick question: do any of Tenaska's trading or data paths run through Chicago, such as CME connectivity or a data center at 350 E Cermak? If so, Crosstown owns underground fiber there, mapped to the conduit, and I can show a provably diverse path. If not, no worries.

The plan

When	Move	Notes
Tue Oct 6	Email Marc Pritchard.	-
Tue Oct 13	Email Gabriel Flores if silent.	-
Nov 2	If no Chicago need, mark Nurture.	-

Guardrails

- Qualify first; don't assume a Chicago footprint.
- Credits used: ZoomInfo company and signals for 1 company; 2 Apollo person enrichments.
