

A second try at Vapor IO's network director

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo

2 outreach waves: Feb-Mar and Sep 2026	1 lead in Wave C	~75 employees (Austin, TX)	0 replies so far
STAGE Wave C prospect. No deal.	RUNNING NOW CTF ABM - Vapor IO (Wave C), 1 lead	LAST TOUCH Sep 29: VM to Patrick Topping (Director, Network Engineering)	NEXT STEP Tue Oct 6: email Patrick a Chicago map offer

Bottom line

Vapor IO builds edge data centers and an edge network (Kinetic Grid) for carriers and enterprises; it is about 75 people in Austin. You've been here twice: a personal email to Greg at Vapor on Feb 24 with a follow-up Mar 3, and this September's Wave C sequence to **Patrick Topping, Director of Network Engineering**, ending in a voicemail on Sep 29. Neither got a reply, and ZoomInfo has no recent signals. This is a patient, low-touch account: one useful map, one follow-up, then nurture until Vapor announces a Chicago site.

What Vapor IO is, in one analogy

Vapor IO builds small neighborhood substations for data instead of power: compute boxes close to where people live. Each substation needs a feeder line back to the main grid. You own feeder lines in Chicago.

Signals worth citing

Signal	Source	So what for the opener
No intent, news or scoops in the last 10 months	ZoomInfo	Nothing timely to cite. Use the map, not a trigger.
Feb 24 and Mar 3, 2026: 'Supporting Vapor IO's Chicago Connectivity Strategy' to greg@vapor.io	HubSpot email history	Previous touch with no reply. Don't repeat the same message.
Patrick Topping, Director of Network Engineering	HubSpot, Lemlist	The right owner. Voicemail greeting on Sep 29 gave the name 'Patrick Alvin'; confirm his surname.

Data notes	HubSpot's Sep 29 call summary calls him 'Patrick Alvin'; Lemlist and HubSpot contact records say Patrick Topping. Confirm on LinkedIn and fix the record.
------------	---

Work already in motion

When	Channel / campaign	What happened	Read
Feb 24, 2026	Personal email	'Supporting Vapor IO's Chicago Connectivity Strategy' to Greg	No reply
Mar 3, 2026	Personal follow-up	RE: same	No reply
Sep 11-28	Wave C, 3 emails	To Patrick Topping	No replies
Sep 29	Phone	VM: Chicago route diversity, Illinois projects	No callback

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Patrick Topping	Director, Network Engineering (HubSpot)	n/a	Owns network design.	Wave C done; VM Sep 29. patrick@vapor.io
Greg (surname unknown)	Unknown title (HubSpot)	n/a	Feb-Mar contact. Identify his role.	No reply. greg@vapor.io

Not worth chasing for this goal

Executives: don't escalate without a Chicago project in view.

How the access path should run

Messages, by contact

1. Patrick Topping Director, Network Engineering

Why them: Give him something to keep, not another ask.

Channel: Email Tue Oct 6 | Subject: A map for your files

Patrick, sorry for the voicemail last week. Rather than ask for time, here's our Chicago ring in KMZ so it's on file if Vapor ever plans a site or a path in the market. If it's ever useful, call me; otherwise no follow-up.

The plan

When	Move	Notes
Thu Oct 1	Confirm Patrick's surname; fix the HubSpot record.	-
Tue Oct 6	Send the map email.	Attach KMZ.
Mon Nov 2	One follow-up asking whether Chicago is on Vapor's 2027 map.	-
Ongoing	Move to nurture; set a ZoomInfo alert for Vapor IO news.	Re-engage on any Chicago or Midwest announcement.

What progress looks like (for management)

By	Milestone	How we will know
Nov 6	Map delivered; Chicago plans known or account moved to nurture	HubSpot note

Guardrails

- No more sequence steps; Vapor has had five emails and a call this year.
- Credits used: ZoomInfo company and signals for 1 company.
