

Volant Trading: finding the infrastructure head

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo, Apollo

0 ZoomInfo signals	1 named buyer (no email)	2 Volant contacts in HubSpot	0 conversations so far
STAGE Untouched prospect. No deal.	RUNNING NOW CTF ENT - Leaders (David Serra), added Sep 30	LAST TOUCH Sep 30: enrollment note only	NEXT STEP Tue Oct 6: LinkedIn connect to David Serra (no email on file)

Bottom line

Volant is a New York trading firm with no ZoomInfo signals, which is normal for a quiet prop shop. The buyer is **David Serra, Head of Infrastructure (New Jersey)**. Neither Apollo nor HubSpot has a working email for him, so the first touch is **LinkedIn**. The two HubSpot contacts (a systems engineer and a C++ developer) are not buyers. This is a low-effort, long-shot account: one clean try, then park it.

What Volant is, in one analogy

Volant is a locked door with one known key holder. Knock once, politely, on the door he actually uses (LinkedIn), then leave a card.

Signals worth citing

Signal	Source	So what for the opener
No intent, news or scoops	ZoomInfo	No trigger. Lead with Chicago futures access.
David Serra, Head of Infrastructure	Apollo, Lemlist	The one buyer; email unavailable.

Work already in motion

Only an enrollment so far.

When	Channel / campaign	What happened	Read
Sep 30	CTF ENT - Leaders	David Serra enrolled	Email step will fail without an address

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
David Serra	Head of Infrastructure (Apollo)	New Jersey	Buyer.	Lemlist Leaders; no email
John Dipaolo	Systems Engineer (HubSpot)	n/a	Could forward internally.	Not contacted
Shah Ishaq	Low Latency Developer (HubSpot)	n/a	Not a buyer.	Skip

Not worth chasing for this goal

Developers. Don't run a broad sequence on a two-person record.

How the access path should run

Messages, by contact

1. David Serra Head of Infrastructure

Why them: Only buyer; LinkedIn only.

Channel: LinkedIn Tue Oct 6 | Subject: (connection note)

David, I run Chicago for Crosstown Fiber: underground routes on-net at 350 E Cermak and Elk Grove, mapped to the conduit. If Volant ever needs a second path into the CME ecosystem, happy to share the map.

2. John Dipaolo Systems Engineer

Why them: Fallback referral.

Channel: Email Tue Oct 13 | Subject: Who owns Volant's Chicago circuits?

John, quick one: who at Volant handles carrier circuits into Chicago? I'd like to send them a conduit map of our routes into Cermak and Elk Grove. Thanks.

The plan

When	Move	Notes
Fri Oct 2	Remove Serra's email step in Lemlist (no address).	-
Tue Oct 6	LinkedIn connect to David Serra.	-
Tue Oct 13	Email John Dipaolo for a referral if no accept.	-
Nov 2	If silent, park until a signal appears.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 20	Serra accepts or Dipaolo replies	Logged
Nov 15	Intro call	Meeting logged

Guardrails

- Low priority. Keep effort to three touches.
- Credits used: Apollo person enrichment; ZoomInfo company and signals for 1 company.
