

TNS: a financial network buyer, and a possible partner

Account entry plan for Spencer Refer | Prepared Thursday, October 1, 2026 | Sources: HubSpot, Lemlist, ZoomInfo, Apollo

4 network/data center intent topics in Sept	45 TNS contacts in HubSpot	10+ touched Sep 30 - Oct 1	0 replies so far
STAGE Prospect. No deal.	RUNNING NOW CTF ENT - TNS (dedicated, Sep 30); CTF INCOMPAS Nashville (Nittler, Zerr, Florack, Yphantides)	LAST TOUCH Oct 1: emails to Amit Gautam, Brandon Young, Dawn Austin, Ananth Baskaran	NEXT STEP Mon Oct 5: email Mark Sheffield (Sr Director, Global Network Planning)

Bottom line

TNS runs a private network for exchanges, trading firms and payment companies, so Chicago is core to its business. It **bought BT's Radianz financial network (Sep 2025)**, keeps adding trading venues (**Bruce ATS, MOON ATS**), and partnered with **Ribbon** in September. ZoomInfo shows **Networking/Telecom 80, Data Center 80, Bandwidth 78 and Cloud 77** intent. HubSpot holds 45 contacts, and a dedicated TNS campaign plus the INCOMPAS meetings campaign are already running. The gap: **the network planning leaders, Mark Sheffield and Robbie Behan, haven't been emailed**. TNS also has a wholesale team (Debi Yphantides), so it could resell Crosstown routes. Pursue it as both a buyer and a partner.

What TNS is, in one analogy

TNS is a toll-road operator for financial data. Every time it adds an exit (a new venue) or buys a road (Radianz), it needs more pavement in Chicago, and Crosstown sells the pavement.

Signals worth citing

Signal	Source	So what for the opener
Networking/Telecom 80, Data Center 80 (Sep), Bandwidth 78, Cloud 77	ZoomInfo intent	Active network and facility research.
Acquired BT Radianz (Sep 2025)	ZoomInfo news	Network integration and route rationalization.
Ribbon partnership for Hosted Cloud Connect (Sep 14)	ZoomInfo scoop	Voice modernization; context.
Added Bruce ATS and MOON ATS market data (Jun-Jul 2025)	ZoomInfo news	New venues, new circuits.

Work already in motion

TNS has the most live outreach in the finance group.

When	Channel / campaign	What happened	Read
Sep 30	CTF ENT - TNS	Dedicated campaign: Joe Lueckenhoff (GM/EVP), Nihar Trivedi, Craig Russell, Kent Kling + about 10 engineers	Sending
Sep 30	CTF INCOMPAS Nashville	Mark Nittler, Bradley Zerr, Paul Florack, Debi Yphantides	Meeting requests sent
Oct 1	CTF ENT - TNS	Amit Gautam, Brandon Young, Dawn Austin, Ananth Baskaran emailed	No reply yet

Who to reach, in order

Contact	Title (source)	Where	Why they matter	Status / email
Mark Sheffield	Sr Director, Global Network Planning (HubSpot)	n/a	Plans where routes go.	Not contacted
Robbie Behan	Sr Director, Network Architecture (HubSpot)	n/a	Designs the network.	Not contacted
Chuck Timmons	Director, Network Design and Delivery (HubSpot)	n/a	Orders circuits.	Not contacted
Don McVicker	Sr Director, Global Data Centers (HubSpot)	n/a	Owens facilities.	Not contacted
Debi Yphantides	Sales Director, Wholesale (HubSpot)	n/a	Partner and resale angle.	INCOMPAS campaign, Sep 30

Not worth chasing for this goal

Product managers for voice and mobile identity, payment sales staff and the CISO aren't buyers for fiber. Trim them from the TNS campaign.

How the access path should run

Messages, by contact

1. Mark Sheffield Sr Director, Global Network Planning

Why them: Plans the routes; Radianz integration.

Channel: Email Mon Oct 5 | Subject: Chicago routes as Radianz folds into TNS

Mark, with Radianz joining TNS and new venues coming online, I'd guess Chicago routes are on your planning list. Crosstown owns underground fiber in Chicago, on-net at 350 E Cermak, Elk Grove and TierPoint on Polk, and mapped to the conduit. Can I send the KMZ for your planning team?

2. Debi Yphantides Sales Director, Wholesale

Why them: Partner angle.

Channel: INCOMPAS (Tony) or email Wed Oct 7 | Subject: Crosstown routes for TNS wholesale

Debi, if TNS customers ask for diverse Chicago paths, Crosstown can supply underground routes on-net at the main carrier hotels. Worth a short call on how we could work together?

The plan

When	Move	Notes
Mon Oct 5	Email Mark Sheffield.	-
Wed Oct 7	Email Robbie Behan; follow up with Yphantides.	-
Fri Oct 9	Trim non-network titles from the TNS campaign.	-
Week of Oct 19	Goal: planning call with Sheffield or Behan.	-
Late Oct	Brief Tony on TNS (Radianz, wholesale angle) ahead of November outreach.	-

What progress looks like (for management)

By	Milestone	How we will know
Oct 9	INCOMPAS conversation logged	Note in HubSpot
Oct 23	Planning call held	Meeting logged
Dec 15	Route quote or partner agreement	Deal created

Guardrails

- Ignore unrelated 'TNS' news (a Pakistani news agency and a fashion brand both appear in ZoomInfo).
- Credits used: ZoomInfo company and signals for 1 company.
